

SureFlap Microchip Cat Flap Fact Sheet

- SureFlap allows only cats whose microchips are stored within the product to enter a home.
- SureFlap is powered by 4 AA batteries and only powers up when a cat tries to enter/leave a home.
- SureFlap works with a cat's existing FDXA, FDXB or Avid Secure/Encrypted microchip (these encompass the vast majority of microchip types).
- SureFlap will work even if a cat wears a collar with a metallic bell or tag.
- A cat's microchip identity will still be stored in SureFlap even if batteries are not installed in the unit.

- SureFlap is currently available in white, and a brown model will be released in September 2011.
- SureFlap stores the unique microchip identities of up to 32 cats.
- SureFlap is compact and suitable for most cat breeds with its 5.59" wide by 5.39" tall entry portal.
- SureFlap is easy to [install](#) in doors, windows and walls and glass mounting and [wall installation kits are available](#).
- SureFlap may be purchased for \$149.99 plus shipping and handling at www.sureflap.com.
